

Whitby Manlift Ticket

Whitby Manlift Ticket - The Manlifts and Elevated Platforms program offers training on the rules, regulations and proper application of safe operating measures and work practices included in daily activities for people who work with this machine. The program has been designed for people who are actively involved in these activities or those who have a basic understanding of this machinery.

Aerial platforms and manlifts have become integral and common machinery in industrial settings during the last few decades. These machines provide an easy way to lift staff close to what should be performed on a stable platform apparatus, enabling workers to do tasks with greater safety and comfort rather than being perched on top of scaffolding or ladders.

The manlift is like other industrial devices in that they are safe if used correctly. As they elevate employees above ground level or floor, accidents can happen easily and this can result in serious injuries or fatalities for both the manlift operators and whoever passerby who may not be lucky enough to be standing beneath.

Manlifts come in different kinds. Most fit into 1 or 2 categories: the scissor lift, that is capable of moving up and down and the articulating boom lift, which can move both horizontally and vertically.
