

## Fall Protection Training in Whitby

There are high numbers of injuries at work linked to falling and a lot of fall-related deaths reported each and every year. Nearly all of these instances could have been avoided with better training, better precautions in place, and by properly equipping personnel before the chance for injury takes place. The third leading reason of death in the workplace is due to lack of right fall protection. This falls behind violence in the workplace and automobile accidents.

Fall-related incidents are the number one reason of death within the construction industry. The potential for fall accidents very much increases based upon the kind of work that is being completed in your workplace. Hence, being familiar with the unique risks which exist within your work environment and in your work situation could help you tackle dangerous situations and be ready for them before they take place as well as help you avoid fall injuries and deaths.

It is helpful to encourage a regular training system at your workplace and encourage other staff to follow the safety precautions and take them seriously. Implementing a setting that encourages training and safety at all times could help you and your co-workers prevent predictable accidents.

Following and implementing a regular safety program at work could help to prevent whatever potential safety related lawsuits and prevent a PR crisis for you company. By encouraging respect and cooperation from your foremen and personnel, issues can be prevented with workers' unions. The best reward would be that you would avoid your staff paying with their lives and or serious health situations which might have been prevented if the proper measures had been used.
